FOR IMMEDIATE RELEASE

Signal Hound Debuts All-New SP145 Spectrum Analyzer at IMS in San Diego

Battle Ground, WA – June 16, 2023 – Signal Hound, a manufacturer of affordable, high-performance test equipment, unveiled its new spectrum analyzer, the SP145, during the IEEE MTT International Microwave Symposium (IMS) in San Diego, California.

"This new product is a direct response to our customers' requests for a 14.5 GHz real-time spectrum analyzer," said Harrison Osbourn, Signal Hound CEO. "The SP145 is an exciting addition to Signal Hound's line of unrivaled test and measurement equipment."

The SP145 is specialized for accurate remote spectrum monitoring and analysis in a portable, durable format. It features 200 GHz/sec sweep speed, 40 MHz streaming bandwidth, and –160 dBm displayed noise average.

An included internal GPS adds a critical dimension of spectrum analysis when out in the field. It is USB-C powered for fast and accurate RF data acquisition in a continuously changing environment.

With specific application toward field use, the SP145 excels at drive test, vector signal analysis, RF survey and even airborne measurement functionality. It fits perfectly in the toolkit of commercial wireless technicians and operators.

Additional features include Programmable API/SCIPI Automation and Real-Time Analysis.

About Signal Hound
Signal Hound is a manufacturer of affordable, high-performance test equipment based in Battle Ground, WA. Starting out as Test Equipment Plus in 1996 and offering used test equipment and repair services, Signal Hound expanded its offerings in 2010 with the introduction of the USB-SA44 USB-powered spectrum analyzer. Signal Hound has since added several award-winning RF spectrum analyzers and signal generators, now sold globally. Visit www.signalhound.com for more information.
